EDUCATION

Beijing Normal University   Beijing, China
M.S. in Applied Psychology   Sept. 2023 – Jun.2025(expected)
- Selected awards: Second-class Academic Scholarship   2024
                                        Outstanding Practical Achievement Scholarship   2024

Beijing Normal University-Hong Kong Baptist University United International College(UIC)   Guangdong, China
B.A. in Applied Psychology   Sept. 2019 – Jun. 2023

RESEARCH EXPERIENCE

Study on Image-based Situational Judgment Personality Tests Using Large Model Generation   Beijing, China
Researcher, supervised by Associate Prof. Zonglei Zhen   Feb. 2024 – Present
- Utilized prompt engineering techniques to expand new approaches in psychological testing, incorporating large models into tests to achieve the development of intelligent psychological assessments.
- Responsible for the construction of automation and systematization of psychological tests, involving designing and optimizing test procedures, integrating large models to enhance test accuracy and effectiveness, developing intelligent testing systems, and testing and validating systems to ensure compliance with statistical standards.

Cognitive Capacity&Aesthetics: The Influence of Visual Working Memory on Landscape Ink Painting Preference
                                                                                                          Guangdong, China
Researcher, supervised by Assistant Prof. Rongrong Chen   Jan. 2022 – Mar.2024
- Designed and implemented a classic 2-back visual working memory task to assess participants' visual working memory capacity;
- Recruited and screened 32 undergraduate participants to ensure no color vision deficiencies or professional art training background;
- Programmed in PsychoPy to execute the experimental tasks, and employed SPSS for data analysis, d-prime calculations, complexity preference indices, and Pearson correlation analyses;
- Authored and published a research paper, revealing that individuals with higher visual working memory capacity tend to prefer ink paintings with higher image entropy, and further studied the relationship between visual complexity and aesthetic preferences, which provided a basis for personalized art recommendation algorithms.
- Presented at the 16th International Symposium on Visual Information Communication Interaction (VINCI'23), where the paper received a Best Paper Honorable Mention award, and delivered an oral presentation at the 45th European Conference on Visual Perception (ECVP).

The 5th Innovation and Technology Education Design Competition   Guangdong, China
Leader   Mar. 2021 – Jul.2021
- Investigated left-behind family information and reviewed relevant literature to gather foundation data.
- Devised an interactive program to collect questionnaire data and represented the team in a project roadshow.
- Earned school-level second prize and the findings were recommended for inclusion in a school-level scientific research project.
